IPv4 Multicast Demo

John Barlow

grangenet

IPTV

Client available to people on the R&E backbone from:

- http://videolab.uoregon.edu/downloads.html

(There is a license issue, but OK when you are on the R&E backbone …)

VideoLan

Provides a client called vlc plus a server, can transmit MPEG2, digital TV, etc (7 to 15Mbps per stream ??)

- http://www.videolan.org/

Apart from bandwidth issues, provides reasonable quality real-time video.
